About

Seeking a rewarding, challenging position with growth potential in a dynamic company, where I can learn as much as possible related to software engineering and web applications.

Work Experience

Developer at Central Geophysical Observatory
June 2015 - September 2015

As part of a team developed document automation system for weather analysis and prediction. This is standalone application written on Node using nw.js [github link](). Was working on report generation feature. Also I was responsible for requirements gathering.

Key Skills

Programming languages: JavaScript
Markup languages: HTML, CSS
Frameworks and libraries: Bootstrap, jQuery, Angular.js
Dev ops: git, Gulp, Digital Ocean
Additional technologies: npm, bower, Trello
Natural languages: Russian, Ukrainian, English(upper intermediate)

Education

Kiev Polytechnical Institute
2015-present

Master's degree in Software Engineering at Faculty of Applied Mathematics

Kiev Polytechnical Institute
2011-2015

Bachelor's degree in Software Engineering at Faculty of Applied Mathematics
